

Competition #5

Websites

Description:

A website must be interactive in order to involve the viewer. Websites should have a URL address and be linked to the school's homepage.

All entries must adhere to the Cecil County Public Schools Media Festival [2010 Guidelines](#) set forth on pages 1-3.

Procedures:

- All entries, from conception to final product, must be written and produced by the students entering the production. However, there is no age limit on the actors or performers who appear in the production.
- Special attention should be paid to copyrighted materials, as stated in the CCPS Media Technology Festival Guidelines, as well as being careful not to plagiarize.
- Entries should have a title and credits within the production.
- The source of any clip art used in the production should be cited within the production.
- For research projects, a bibliography of sources should be included in the production.
- Because of technological uncertainties involved in accessing all URL addresses, all website entries must also submit a CD as a backup. MAC format is preferred.
